OPEN THE CASE.

Ordinary plans. Extraordinary plot twists.

YOUR PEOPLE. YOUR STORY. ONE UNEXPECTED TURN.

We turn gatherings into mysteries that people solve together.

PlotTwist Experiences is a fictional studio designing personalized mystery adventures for birthday hosts, curious friends, and workplace teams. Every guest becomes part of the story: a clue to notice, a choice to make, a moment to share.

01

Stories shaped around the occasion and the people in it.

02

Together by design

Clues and choices invite guests to collaborate.

03

Human at the center

Real event details need a conversation with our team.

THE PEOPLE BEHIND THE PLOT

Meet the story team.

Four fictional roles. One shared goal: a delightful mystery experience.

A

ASEEL

Story Director

Shapes narrative arcs, memorable reveals, and the role each guest can play.

N

NOAH

Puzzle Architect

Designs clues and challenges that support the story and invite collaboration.

J

JISO

Experience Producer

Coordinates event requirements and reviews the practical details with the customer.

F

FELIX

Guest Experience Lead

Handles enquiries, listens to feedback, and arranges human follow-up.

The virtual front door: Clue

A warm, lightly playful adventure consultant that explains services, records enquiries, and flags unanswered questions for human attention.

THE CUSTOMER PLAYBOOK

The story starts with a conversation.

01

DISCOVER

Ask about the occasion, group size, preferred style, and any requirements.

02

MATCH

Explain a suitable published option and its starting price. Label new story ideas as proposals.

03

CONNECT

Offer to save an enquiry. Collect the customer's name, email, and notes for that purpose.

04

CONFIRM THE RECORD

Report the actual tool result. A saved local enquiry does not send email or reserve an event.

CLEAR BOUNDARIES MAKE A BETTER EXPERIENCE.

No invented promises

No live calendar, fixed venue, verified location, payment service, or confirmed dates are provided. Access needs, wheelchair access, and languages need human review.

Keep the conversation useful

Log unanswered questions and feedback. Do not request contact details to record feedback. Never invent a response time or claim that a saved record sent an email.

Demo enquiry: "I'm Sam Rivera, sam@example.com. Please save my interest in a birthday mystery for 10 people." Use synthetic contact details in classroom demonstrations.
